Luis,

the phones are down today (I'm on travel all this week), but the GIS folks said they had a draft ready last Wednesday. I'm still trying to get in touch with them on the outputs so I can forward them on. Thanks.

Subject: Circle Court - GIS Information for Beacon Environmental

Hi Vince

Hope you enjoyed your Thanksgiving holiday.

I just wanted to follow up with you regarding provision of the following GIS information, which has been requested by Beacon Environmental in order to generate the contour maps:

"With regards to the information/files we request/require to generate the contour maps, we would like the following:

1 - Scaled drawing of the site (e.g., AutoCad file or GIS Shapefiles) showing the relevant site features (buildings, roads, etc.) with final sample locations plotted and labeled - Note the Map parameters: system, zone, datum, and map units (for example - US State Plane, NC Zone, NAD 83, Feet)

2 - PDF file showing the sample locations on the map with the relevant features
-- If you are collecting GPS coordinates of the sampling locations, please send us an Excel spreadsheet of coordinate data in the same system/zone as the scaled drawing. Include the Sample Location ID, Easting, and Northing (if possible, please use state plane feet or UTM meters rather than Lat/Long degrees to make the map more precise)."

Thanks

Luis Vega
